HINOKI

Hinoki Dividers Collection

Hinoki in giapponese significa Cipresso.

Hinoki è un pannello multi-funzionale. Una linea di paraventi e screen divisori modulari, autoportanti se posizionati a terra o agganciati a strutture se applicati a un piano di lavoro, per separare senza dividere.

Hinoki è pensato per le aree open space e per fornire pannelli divisori da scrivanie, utili per schermare le postazioni e garantire salute e privacy per chi le utilizza.

Hinoki non nasce solamente per dividere gli spazi, ma amplia la sua funzione in base al materiale e agli accessori di cui è corredato.

Hinoki in Japanese language means Cypress.

Hinoki is a multifunctional panel. It is a series of screens and modular dividing partitions, which are self-supporting if they are on the ground or hooked to structures if they are applied to a desktop in order to separate without dividing.

Hinoki has been thought for open space areas and for supplying dividing partitions for desks. They are useful to shield workstations and to guarantee the health and the privacy of the people who use them.

Hinoki has not only been thought for dividing spaces, but it widens its function according to the materials and accessories it is equipped with.

Federica Biasi ha progettato per Manerba la linea Hinoki, un elegante sistema di paraventi e screen divisori modulari, pensati per far sentire le persone il meno possibile isolate e aiutarle a ri-vivere serenamente gli spazi condivisi, in un momento particolare della nostra storia, dove, per la sicurezza di tutti, dovremo sottostare alle nuove regole del distanziamento sociale.

Federica Biasi designed the Hinoki collection for Manerba, which is an elegant system of screens and modular partitions, thought for making people feel less isolated and helping them to happily experience again shared spaces. This is a peculiar moment of our history, in which, for everyone's safety, we should comply with the new rules of social distance.

Hinoki nasce come pannello in polycarbonato alveolare, incastonato su una struttura in metallo a sezione piatta autoportante, a terra o su ruote, verniciata a polveri nelle molteplici colorazioni Manerba, in modo da coordinarlo cromaticamente con le altre collezioni del catalogo.

Hinoki is a honeycomb polycarbonate panel, which is set in a metal structure with a flat self-supporting section, on feet or on wheels, powder coated in several Manerba lacquered finishes in order to chromatically coordinate it with other collections of the catalogue.

Il tocco raffinato del colore, la semitrasparenza del materiale, la semplicità del segno progettuale, rendono Hinoki un elemento divisorio familiare e quindi integrabile in svariati spazi condivisi, utile per proteggere e mantenere le distanze, in modo amichevole e flessibile.

The elegant touch of the colour, the semitransparency of the material and the simplicity of the design make Hinoki a domestic dividing element which can be easily integrated in several different locations. It is useful for protecting and keeping the distances in a friendly and flexible way.

Screen da scrivania H70 cm in policarbonato alveolare bronzo fumè e staffe verniciate corten AK2.
Freestanding screen H70 cm for working tops in honeycomb fume bronze polycarbonate and brackets coated with corten AK2.

Il sistema di divisori Hinoki offre diverse soluzioni anche per la schermatura delle postazioni di lavoro. Sono disponibili screen in 2 differenti altezze (35 e 70 cm), con staffe coordinate, da collegare al piano scrivania oppure semplicemente in appoggio sul tavolo.

Hinoki system offers different solutions also for shielding the workstations. Screens are available in two different heights (35 and 70 cm), with coordinated brackets, to be connected to the working top or simply placed on the desk.

Hinoki nasce come pannello in policarbonato alveolare (resistente, flessibile e refrattario all'usura, ai graffi e agli agenti chimici) ma l'estrema flessibilità compositiva permette di utilizzare anche altri materiali come sughero (indicato per le sue naturali qualità antibatteriche), policarbonato compatto, lavagna magnetica, oltre alla possibilità di essere rivestito in tessuto dalle proprietà fonoassorbenti. I pannelli sono personalizzabili nelle dimensioni e possono essere attrezzati con ganci, elastici, calamite, mensole e appendiabiti mobili.

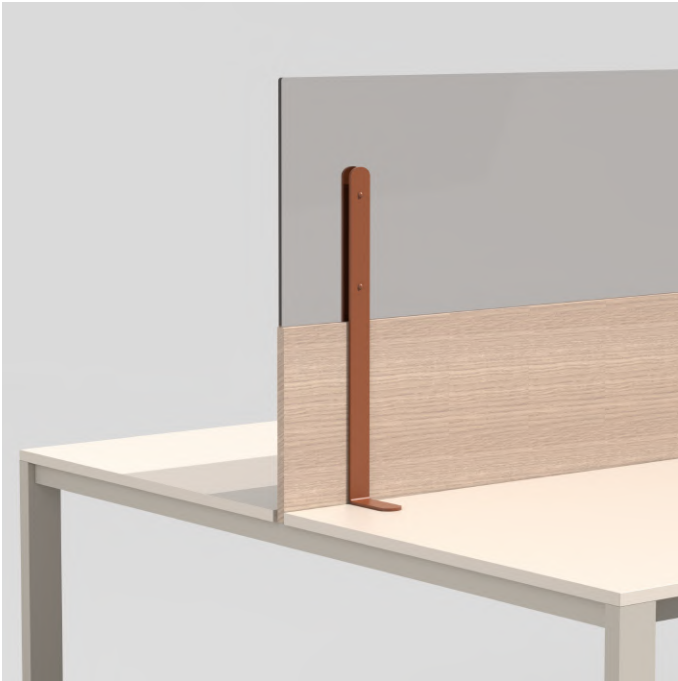

Hinoki is a honeycomb polycarbonate panel (resistant, flexible and refractory to use, scratches and chemical agents), but the exceptional content flexibility allows the use of other materials like cork (recommended for its natural antibacterial features), compact polycarbonate, magnetic board. Moreover it can be upholstered with fabric with sound-absorbing properties. The panels can be customized in the size and equipped with hooks, elastic bands, magnets and moving coat rack.

Divisori autoportanti con pannello rivestito in tessuto, in sughero e lavagna magnetica.
Freestanding partitions with panel upholstered with fabric, cork and magnetic board.

Paretina autoportante con pannello in policarbonato alveolare neutro e staffe in finitura galvanica.
Freestanding screen with a neutral honeycomb polycarbonate panel and brackets in galvanic finish.

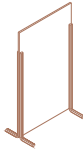

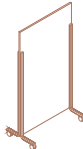

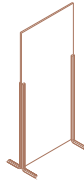

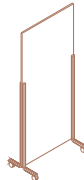

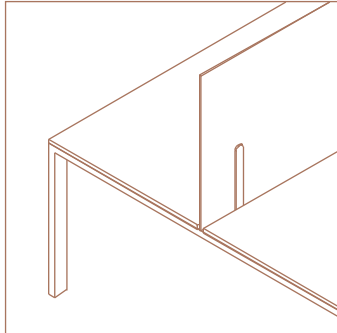

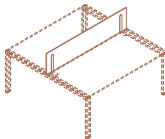

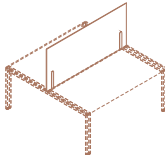

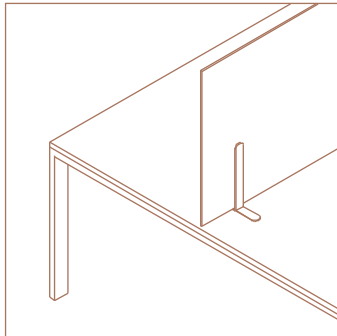

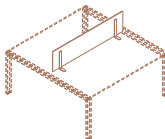

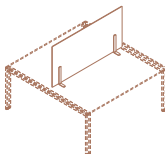

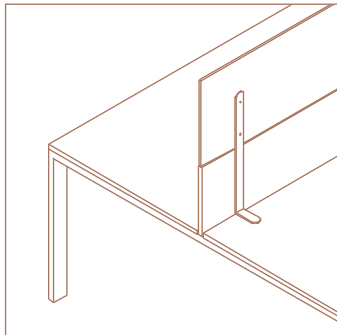

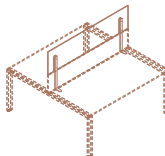

Il sistema Hinoki prevede anche soluzioni freestanding, in appoggio su scrivania, oppure pannelli sopraelevati in polycarbonato compatto, da montare su screen esistenti per aumentare la schermatura di sicurezza

Hinoki system has also freestanding solutions, placed on the desk or raised panels in compact polycarbonate to be set on existing screens in order to increase the safety shielding.
