

Manerba

Stem

Femminilità e colore nel design per l'ufficio.
Femininity and colour for office furniture design.

Stem

Philippe Nigro

Philippe Nigro ha progettato la libreria Stem a partire dall'analisi pragmatica del "know-how" di Manerba e dall'idea di unire tre elementi semplici: colonne, traversi in metallo e piani. Da questa combinazione nasce un "infinity system" con diverse soluzioni di design per l'ufficio: libreria, divisorio, aree sedute, acoustic privacy, lounge.

Philippe Nigro designed the Stem bookcase starting from the pragmatic analysis of Manerba's "know how" and the idea of linking simple basics: three components – columns, metal crossbeams and shelves. This combination gave rise to an "infinity system", like leaves from a stem, of office design solutions, consisting of bookcases, partitioners, "acoustic privacy", and lounge areas.

Philippe Nigro

Designer francese nato a Nizza. Svolge la sua attività tra Francia e Italia. Ha studiato Arti Applicate e Product Design (L.da Vinci, Antibes - La Martinière, Lyon - Boulle, Paris). Il lavoro di Philippe Nigro è caratterizzato dalla connessione tra ricerca sperimentale e analisi pragmatica del "savoir-faire" dei committenti con cui lavora. Ha iniziato la sua esperienza a fianco di M. De Lucchi con il quale ha partecipato alla progettazione di molti prodotti, mobili, illuminazioni, interior, eventi, scenografie. Vari progetti sperimentali sono stati sostenuti dal VIA Francese (Valorizzazione dell'Innovazione nel mobile). Nel 2014 gli è stato attribuito il riconoscimento di designer dell'anno di Maison&Objet. Alcuni dei suoi progetti sono presenti nelle collezioni del Centre Pompidou e del Musée des Arts Décoratifs di Parigi tra cui Twin-Chairs, T.U, Confluence.

A French designer born in Nice, Nigro carries out his activities in France and Italy. He studied Applied Arts and Product Design (L.da Vinci, Antibes - La Martinière, Lyon - Boulle, Paris). The work of Philippe Nigro is characterized by the connection between experimental research and pragmatic analysis of the "savoir-faire" of the clients with whom he works. He began his experience alongside M. De Lucchi with whom he participated in many product projects, furniture, lighting, interiors, events, scenic design. Various experimental projects were supported by the French VIA (Valorisation of Innovation in Furniture). In 2014 he was awarded recognition as Maison & Objet Designer of the Year. Some of his projects are present in the collections of the Center Pompidou and the Musée des Arts Décoratifs in Paris such as the TwinChairs, T.U, Confluence.

Stem Infinity System

Stem significa Stelo.

Uno stelo da cui si dipartono foglie, funzioni, modi di vivere.

Stem è l'incontro tra Philippe Nigro, giovane designer francese e Manerba, storica azienda mantovana.

Stem è ufficio, casa, negozio, hotel, biblioteca, area break.

Stem è divisorio, libreria, contenitore, divanetto, guardaroba, protezione acustica, cassettera.

Stem è un ventaglio di soluzioni funzionali, modulari e sistemiche, per dare vita a spazi human friendly.

Stem è una micro architettura, che guarda oltre il mondo dell'ufficio, capace di coesistere in spazi ibridi e ambienti domestici (Philippe Nigro).

Stem è FSC, scomponibile in kit, riciclabile e ricco di colori possibili.

Stem as stalk.

A Stem from which leaves, functions, lifestyles depart.

Stem is the encounter between Philippe Nigro, an established French designer and Manerba, a historical company from Mantua.

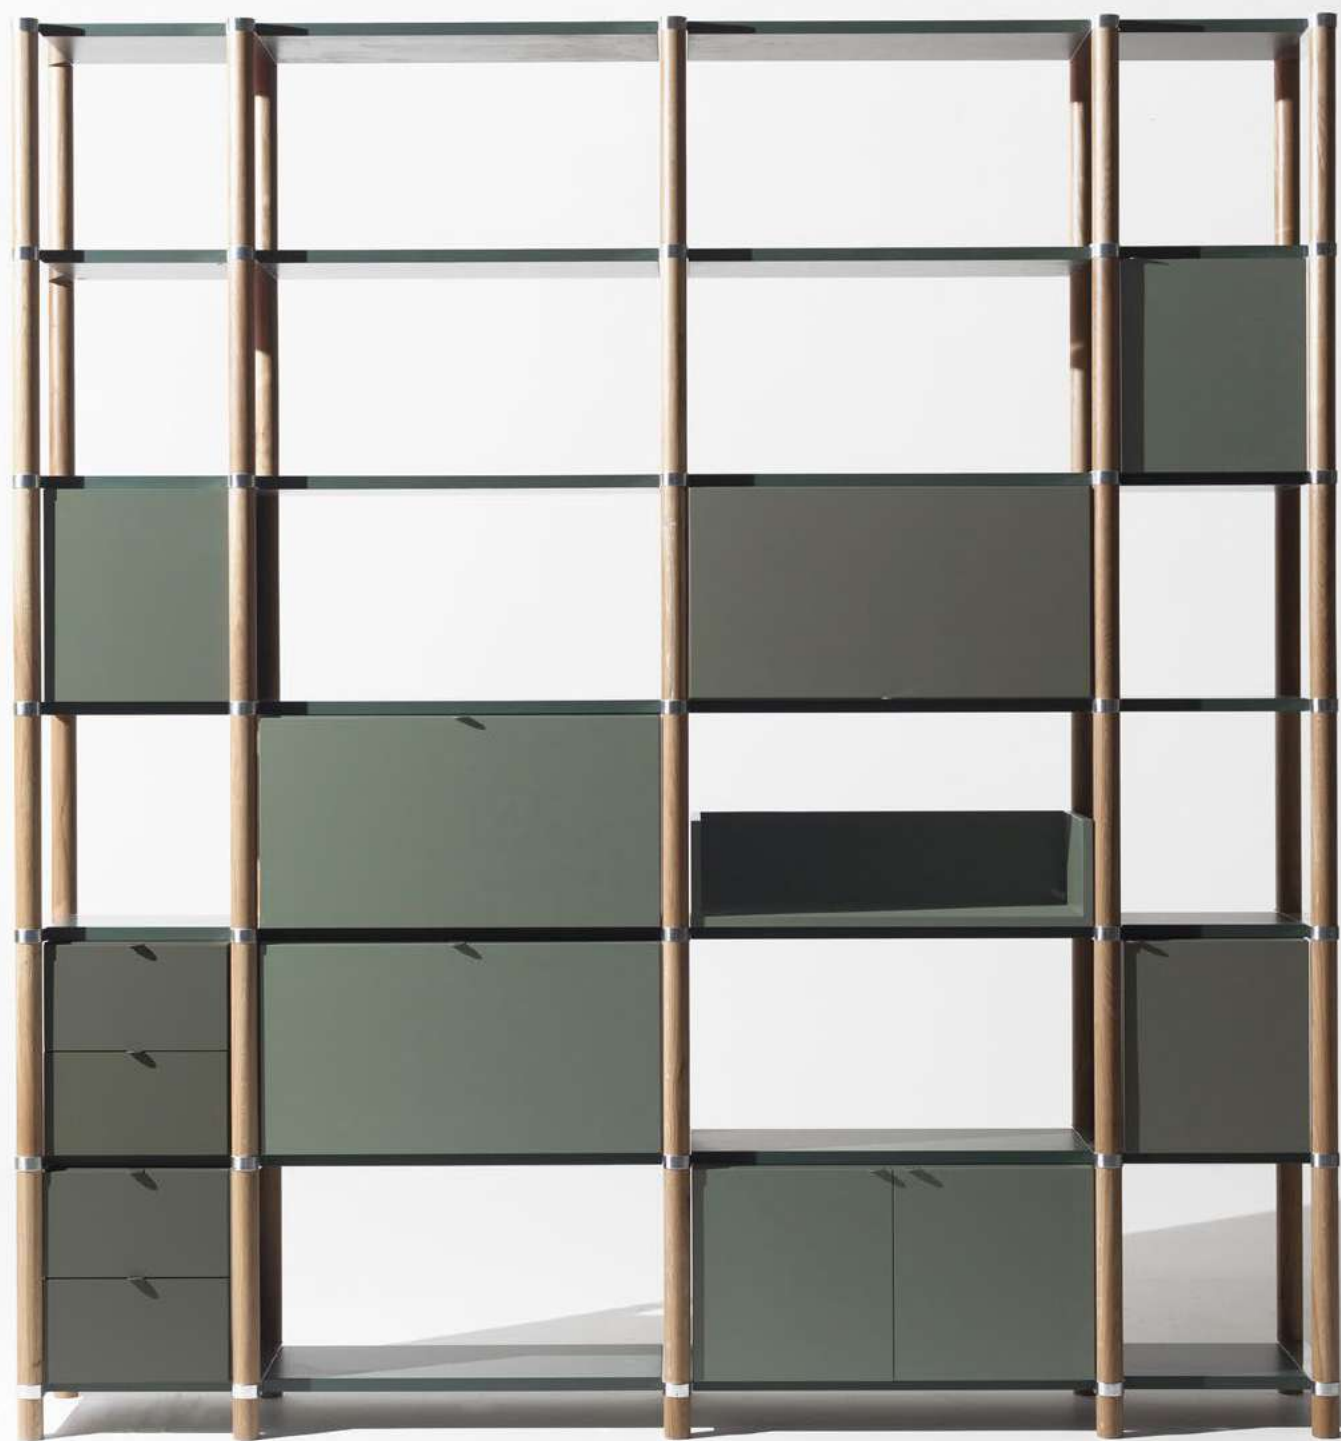

Stem is office, home, shop, hotel, library, break area.

Stem is room dividers, bookcases, multi-purpose containers, sofas, wardrobes, acoustic protection, chests of drawers.

Stem is a range of functional, modular and systemic solutions to create people-friendly spaces.

Stem is a micro architecture that looks beyond the office world, capable of coexisting in hybrid spaces and domestic environments (Philippe Nigro).

Stem is FSC, modular, recyclable and available in many possible colours.

I contenitori di Stem vengono inseriti in appoggio nei vani a giorno, mediante un semplice sistema di fissaggio a pressione. L'assenza di fori strutturali permette la totale reversibilità del layout.

Stem multi-purpose containers are placed in the open compartments by means of a simple pressure fixing system. The absence of structural holes allows the layout to be totally reversed.

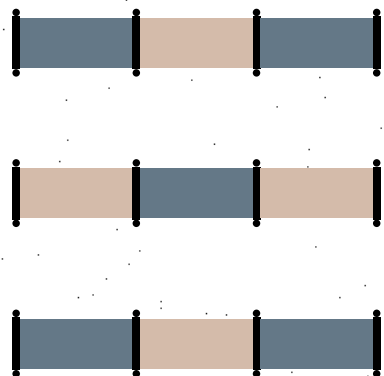

Una micro architettura, che
guarda oltre il mondo dell'ufficio,
capace di coesistere in spazi ibridi
e ambienti domestici.

*Stem is a micro architecture, that contemplates not only the
workplace but its possibilities to coexist with both hybrid areas
and home spaces.*

Stem nasce dall'analisi dei sistemi di archiviazione nell'ufficio classico, per poi passare ad una progettazione in grado di dialogare con la contemporaneità ed adattarsi alle nuove forme di lavoro.

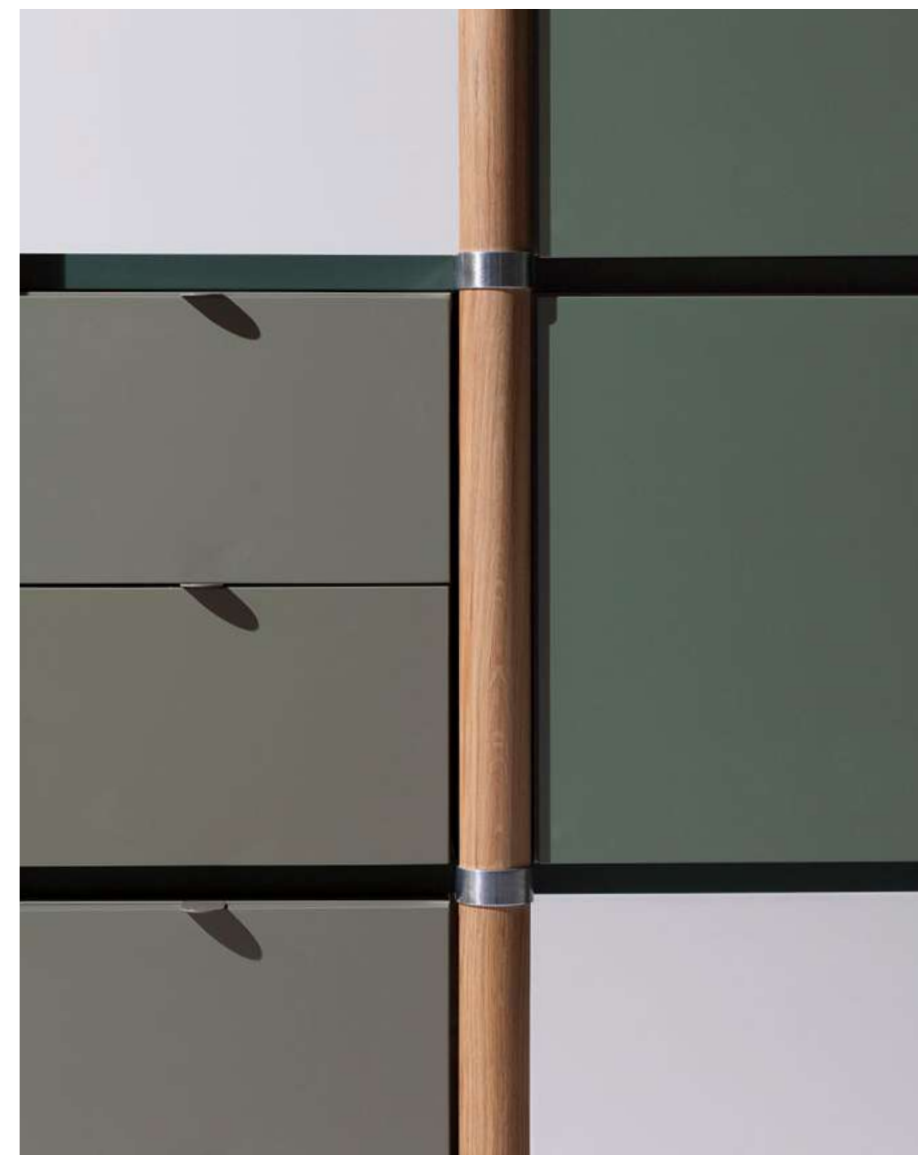

Stem was born from the analysis of filing systems in the classic standard office, and then proceeded to a design capable of interacting with the contemporary office thus adapting to the new working styles.

Philippe Nigro

La struttura del sistema, è formata da montanti di proporzioni importanti in legno, collegati tra loro da traversi in alluminio. I contenitori, prevedono finiture laccate in perfetto abbinamento con le maniglie in acciaio verniciato e con le colorazioni dei montanti, a scelta tra essenze naturali e nuance che lasciano intravedere la venatura del legno.

The structure of the system is composed of big wooden struts, joined together by aluminum beams. The multi-purpose containers have lacquered finishes that perfectly match the chrome-plated steel handles and the colours of the struts, to be chosen between natural wood veneers and nuances that allow a glimpse of the wood grain.

Un sistema architettonico, dove la modularità degli elementi permette di ampliarsi in ogni direzione, come in un gioco di costruzioni.

La libertà di immaginare il proprio spazio.

Stem is an architectural system, where the modularity of the elements allows it to expand in every direction, as in a constructions game. It's the freedom to imagine your own space.

Philippe Nigro

Libreria a giorno con montanti in alluminio pressofuso rigato, ripiani in essenza di legno rovere e schiene strutturali di irrigidimento in lamiera microforata.

Open bookcase with uprights in striped die-cast aluminium, shelves in oak wood veneer and stiffening structural backs in perforated metal sheet.

Le librerie Stem prevedono una versione molto competitiva in termini di prezzo, con montanti in alluminio rigato e ripiani e contenitori in legno melaminico sabbia.

Stem bookcases have an extremely competitive version in terms of price, with uprights in striped aluminium and shelves and containers in sand melamine.

Stem by Philippe Nigro - Behind the Scene

Soluzioni funzionali, modulari e sistemiche. Proposte ricche di dettagli e materiali naturali per dare vita a spazi human friendly.

Nidi di relax si alternano a pieni e vuoti per l'archiviazione.

Functional, modular and systemic solutions. Stem proposals are rich in details and natural materials to create people-friendly spaces. Relaxing nests alternate with full and empty spaces for storage.

Philippe Nigro

Stem offre al progettista soluzioni alternative, integrando la funzione contenitiva e divisoria con un sistema di sedute modulari imbottite. Anche le ante dei contenitori sono personalizzabili con l'applicazione di pannelli rivestiti in tessuto fonoassorbente.

Stem offers the designer alternative solutions, integrating the containing and dividing function with a system of upholstered modular seats. The doors of the containers can also be customized through the application of panels covered with sound-absorbing fabric.

Grazie all'estrema flessibilità del sistema Stem è possibile creare composizioni libreria ad angolo e con panca, che si adattano alla perfezione per arredare e dividere ambienti open-space e aree break.

Thanks to the exceptional flexibility of Stem system, it is possible to create compositions with corner bookcase and bench, which can perfectly adapt to furnish and divide open spaces and break areas.

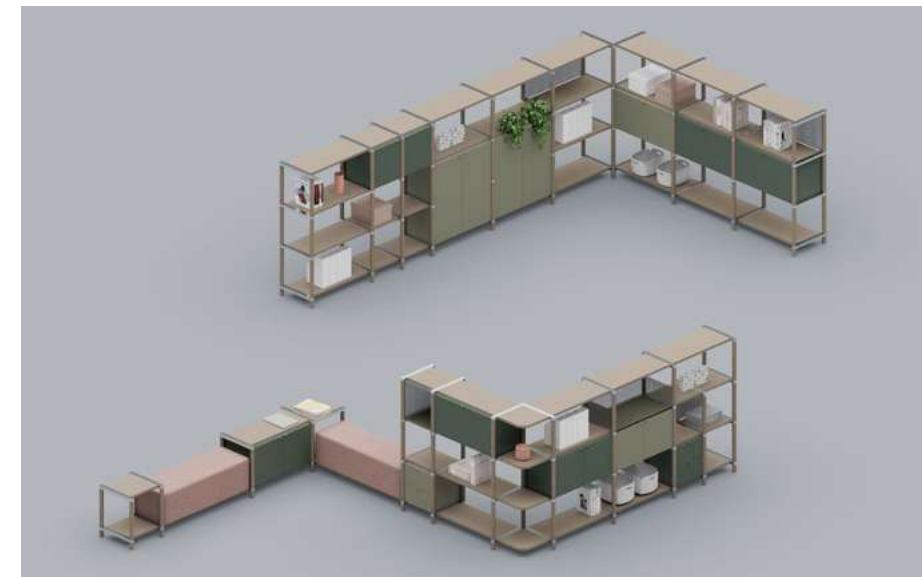

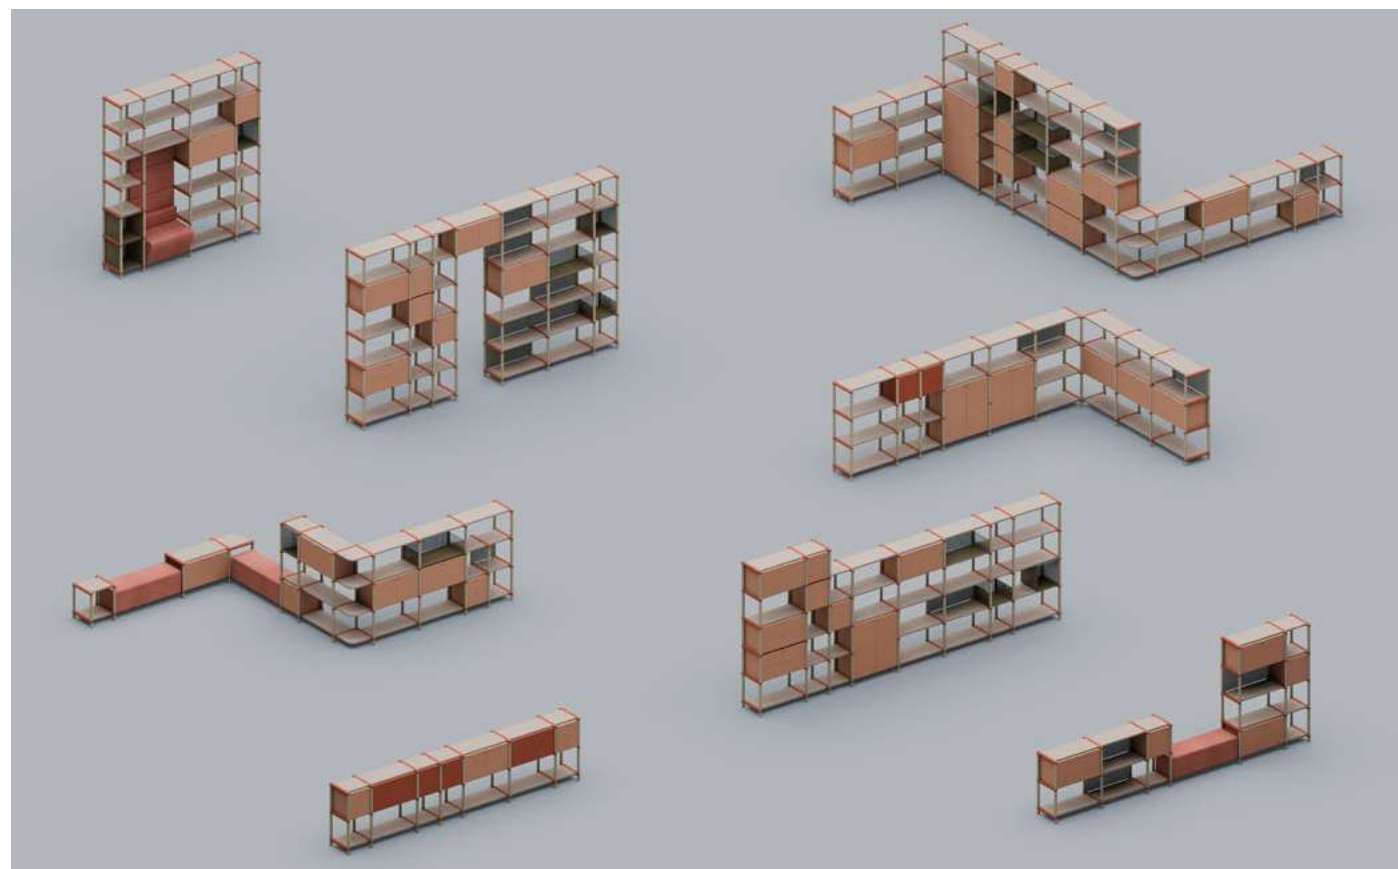

Stem System

Composizioni Compositions

L'estrema flessibilità di Stem permette di realizzare infinite configurazioni. Oltre alla classica libreria a muro, il sistema consente di modulare soluzioni divisorie a centro stanza e la progettazione di aree smart working di uffici e hotel.

Stem's extreme flexibility allows for endless configurations. In addition to the classic wall bookcase, the system allows you to modulate partitioning solutions in the center of the room and the design of smart working areas in offices and hotels.
