Seating Collection

Lia

LIA è un’ampia famiglia di sedute ergonomiche per l’ambiente ufficio contemporaneo. La forza di questa collezione è la possibilità di poter utilizzare all’interno di un progetto lo stesso linguaggio stilistico. Il design morbido e accogliente asseconda i più stringenti requisiti di ergonomia avvolgendo la schiena e sostenendo la parte lombare.

LIA is an extended family of ergonomic seating for the contemporary office. The strength of the collection is its ability to use the same stylistic language in a given project. With a snug, attractive and welcoming design, it provides perfect support for the back and lumbar region.

Snap

SNAP
Seating Collection

Pratica e innovativa famiglia di sedute monoscocca per ufficio, aree break e meeting. L'elemento che connota la collezione è il design della seduta, interamente realizzata in polipropilene o imbottita e rivestita nelle vivaci colorazioni dei tessuti Xtreme, Happy e Join. Basi fisse o girevoli, su ruote o con gambe in legno di faggio: Snap è un programma di sedute completo e trasversale, che dialoga in modo naturale con le nuove tendenze dell'arredo smart.

A practical and innovative family of monoshell seats for offices, break areas, and meetings. The defining element of the collection is the seat design, entirely made of polypropylene or padded and covered in the vibrant colors of Xtreme, Happy, and Join fabrics. Fixed or swivel bases, on wheels, or with beech wood legs: Snap is a complete and versatile seating program that naturally fits into the new trends in smart furniture.

Super Random

Il progetto SUPER RANDOM di Manerba, disegnato da Gio Tiroto, nasce seguendo i principi di sostenibilità e disassemblabilità. La volontà è quella di costruire un sistema d'arredo, pensato prevalentemente per gli ambienti di lavoro. Un sistema la cui sfida progettuale è la massima trasformabilità. SUPER RANDOM si espande e si moltiplica non solo per geometrie ma anche per funzioni: è riconfigurabile, spostabile, impilabile, disegna gli spazi con linee rette e curve. La ricerca si è focalizzata nel trovare più soluzioni di arredo e seduta attraverso l'uso di una sola tecnologia: la curvatura del legno multistrato FSC certificato.

The SUPER RANDOM project by Manerba, designed by Gio Tiroto, complies with sustainability and disassembly principles. The idea aimed at offering a furnishing system, mainly designed for workplaces. A system whose inner nature is maximum convertibility. SUPER RANDOM system expands and multiplies geometrically and functionally: it is versatile, mobile, stackable, its shape can be recombined in radial clusters or linear bars. Using vjjust one single technology, the bending of FSC-certified multilayer wood, the research focused on finding more design and seating solutions.
